Philada Augt 8. 1814

Dear Sir

If one half dozen have not reached Washington through the Banks, I will send you if you please, 5 or 10 dollars worth, which you can obtain by a Bank note. Would it be acceptable or would it be liable to be misunderstood, if I should at the same time send a specimen of them to President or to any other member of the Cabinet. They are framed but are not lumpers, though like the dozen of this year superior to any dies hitherto upon the higher edge given by milling with the blank margin round the head, are a valuable improvement. New original dies are making in order to increase them as I wish and shall ultimately I hope accomplish.

Yours sincerely

Saml Moore

Hond S. D. Ingham

Samuel Moore Esq.
Supt. of the Mint, Phila.

Department of State
27th March 1835.

Sir,

I will thank you to cause to be prepared two sets of the coins of the United States in cases similar to those already prepared for this Department. It is desired that they should be ready in time for the sailing of the United States Sloop of war Peacock. That ship is now at Newyork under sailing orders but its departure will probably be delayed until the 10th of April. As soon as they are ready, you will send them addressed to Edmund Roberts Esq. under cover to the collector of that port. The choice of the coins and of the devices is left to your own taste. It is hoped that all practicable despatch will be used in the fulfilment of this request.

I am, Sir, your obed. servt.
John Forsyth

Andrew Dunlap Esq.
U. S. Atty. Boston

Department of State
31 March 1835.

Sir

Your letter of resignation has been received, and the office transmitted with it has been vacated according to your request, presented in the accompanying

Record Group No. 59

Mint of the United States
Philadelphia, Sept. 6. '36.

Dear Sir,

Mr. Eckfeldt had sent us four bags of gold for you, &c, to pay the $5,000 for which you ask in your letter of yesterday, he says that one of them must be ours. You will get nearly all your gold in quarter eagles.

We shall be coining half dollars by steam in a few days, and we shall issue them somewhat improved in their face, and a tenth of an inch narrower. We are getting rid of the Blood-pennies as fast as we can.

Very respectfully
Yours truly
R. M. P.

Dear Sir

Genl Archbold, Esq,

Mint of the United States
Sept. 22d, 1836.

Sir,

The dies for the new dollar having been sunk by Chas. Gobrecht, and the inspection approved by the Treasury Department, I am exceedingly desirous that you shall take, without delay, the necessary measures for an early issue of dollar coins. For this object I pray you to have the dies and working dies prepared, on the proper arrangements adopted for cutting and milling the planchets, and coining them in the large screw presses, — the pieces being struck in a close reeded or grooved collar.

The employment of the screw presses is only to be temporary, and

you are aware that it is of great importance that the Penn-pieces for dollars should be completed at as early a day as possible. For this purpose, — the steam machine-shops being now ready, — I beg you to take every exertion to find suitable workmen, in addition to those already in the Mint, who may be employed upon the new pieces till it is finished: — these men not to be enrolled among the regular hands, but to be employed only for this special object; and paid from the appropriation for new machinery &c.

Most respectfully
& truly Yours
R. M. Patterson,
Director

Hon
Adam Eckfeldt, Esq.
Chief Coiner

Mint of the United States.
Philadelphia, Nov. 8, 1836.

Sir,

I have the pleasure to send you herewith, and to beg you to exhibit to the President, the first specimens of our coinage of silver by steam, executed this afternoon. The milling, as well as the striking, has been done by the new machinery, and the steam-power; and the saving of labor, and the acceleration of our work, will be very great. Hitherto we have used two screw-presses for coining half dollars, — one of them only occasionally. The smaller of these presses required three men to work it, the larger, four. The steam press, with a single hand

K. M. Patterson Director.
to
Levi Woodbury, Sec of Treas

11/2/36

to find in the planchets, will do more work than three two pounders with seven hands. — You will observe, too, that the work is better done. The old coin was struck in what we term an open collar; this is struck in a close collar, which makes the edge of the pieces thicker, and gives a mathematical equality to their diameters.

I think, also, that you will not fail to see a considerable improvement in the impressions themselves. We do not, indeed, consider this as a new coin, such as the dollar will be; yet both the face and the reverse have been altered in many particulars, as you will see by a comparison with the old half dollar. These alterations, including a change in the diameter of the piece, are such as were introduced in the quarter.

Boston, Sept. 8, 1838.

Dear Sir,

Your letter of the 1st inst. was duly received. You will please accept my thanks for your kind and prompt attention to my inquiries.

As to the collection which Mr. Durand is forming for me, I shall adopt your suggestion, and let it remain until it is more complete, — or, at least, until I have an opportunity of sending to Phila. by a private hand.

I thought it highly probable that the small silver coin mentioned in my last letter was what your chief coiner supposed it to be, — Provincial, — until I happened to see, yesterday, in the Cabinet of the Massachusetts Historical Society, a perfect specimen. It turned out to be Dutch. On the side, which, in the pieces in my possession, is worn quite smooth, is the word (in three lines) "Hal- lan- dia". The date is 1760.

In answer to your question whether my fancy leads me to make a collection of foreign coins, — I have to say, that I have a very miscellaneous collection of silver coins, perhaps 700 or 800, — and about as many of Copper: but none of gold. My principal reason for omitting to say much of the few gold coins which have come in my way, is, that the investment of money would be too great for my limited

meand. I should be willing to confine my Collection of foreign Coins (with few exceptions) to those of Great Britain and France; and if any gold Coins of those Countries, (other than those of a very recent date) should come in your way, — I should be glad to obtain them, — unless some one had prior claim: say English Coins of Queen Anne or of any earlier reign, — and French of Louis 14, or earlier. I suppose, however, that the foreign Coins sent to the mint are, generally, of a very recent date.

I am very glad to receive a Commission from you, to procure foreign Coins for your use; and you may be assured that I shall do every thing in my power to accomplish the object.

I have requested several of our Agents here and receiving tellers at our banks to lay aside any Coins which you ask for, — if they should come into their hands. I fear, however, that the chance of procuring them here is small.

I think I shall be able to get a Complete Collection of the Coins of modern Greece, — but perhaps not in season for the purpose for which you may want them. Still, as they will cost, if I can procure them, only the intrinsic value, — I shall make the attempt. My friend Professor Felton of Cambridge, is intimately acquainted and corresponds with Mr. Pericard, the American Consul at Athens; and

I doubt not that, in time, I shall be able to obtain the desired specimens as far as the Greek Coinage is concerned, - and, possibly, some Coins of Egypt and Turkey.

Since I saw the contents of the Cabinet of the Historical Society here, (a Society, by the way, devoted exclusively, I believe, to the collection of materials for American History,) I have felt a stronger desire than ever to make a complete Collection of our own Coins. I found, on a hasty examination, only a single Coin struck since the establishment of the U.S. mint: a solitary half eagle of 1795.

Very respectfully
Your obliged Servant.
W. G. Stearns.

Mint of the United States.
Aug. 15th, 1838.

Dear Sir,

Mr. Sparks's letter of the 19th of June, enclosing your inquiries respecting the coinage at this Mint, was duly received, and was immediately put into the hands of one of our officers to procure the information asked; when, unfortunately, it was dismissed from my mind, and I have therefore now to apologize for a delay in attending to this correspondence, which I sincerely regret.

In reply to your first queries, I have to state that the first coinage at the Mint was made in 1792, and consisted of about 1500 half-dimes;—no other coins having been struck in that year. In 1793 there was no coinage except of cents and half-cents,—which were also coined in '94 and '95.—... In 1794, in addition to the copper coinage, there were struck 5300 half dollars and 1758 dollars. These dollars are now very scarce—we have but one specimen, and that is worn.—

In 1795, Dollars, Half dollars, and Half dimes were coined; and in this year the first gold coinage was made, consisting of 2795 eagles, and 8707 half eagles.

Cents were certainly coined with the date 1823, for I have now a Specimen before me; but no delivery of cents was made in that year, from the Coinage to the Treasurer, and hence the omission in our tables. The quarter dollar of 1824 must, I presume, be explained in the same way, but we have no Specimens of this Coinage in our collection.

Our Assistant Assayer, Mr. Du Bois, has undertaken to make, as soon as practicable, the collection of gold coins which you ask for, and has already paid aside for you the following.

Eagles of 1797, 1799, 1800, 1801, 1803, 1804.

Half eagles of 1795, 1800, and from 1802 to 1813, both included.

As to the ~~other coins~~ dimes and copper coins, the opportunity of making collections is not permitted at the Mint, as no such coins are received except since

on deposite. If, however, any of the coins you ask should come into our hands, you shall not be forgotten.

I will give my great attention to aid you in your interesting design, and whenever you think it may be in my power to do so, I pray you to call on me freely.

Yours,

F. M. S.

Boston, August 23. 1838.

Dear Sir;

Your very obliging letter of the 15th. inst., in answer to my inquiries which were communicated to you through the kindness of Mr. Sparks, - was received on Saturday last. I beg you to accept my sincere thanks for the interest which you manifest in the success of my project, and for the trouble you have taken in my behalf. It has given me great pleasure to learn, from an authentic source, several interesting facts in relation to the history of the coinage of the United States, about which I could not satisfy myself, even after pretty extensive inquiry.

You do not inform me when, & in what manner, you wish me to receive and pay for the coins which Mr. DuBois is laying aside for me. In this matter I wish to consult your and his convenience. I will take them in parcels, as they are collected, or wait until the collection is as nearly complete as may be, - as you please. I have a friend who expects, shortly, to go to Phil.a, - and I shall ask him to call at the Mint, and make inquiry into this matter. But if you should wish the coins already collected to be taken away immediately, be good enough to advise me on the subject, and I will

remit funds to you, in any form you may direct.

Do you know what is the device on the half dimes of 1792? If so, - be good enough to tell me, in your next letter, - whenever you are inclined to write me again. The day before I received your letter, I picked up a small silver coin, much worn - about the size of the half dime, - which I have thought, since I heard from you, - might possibly be one of the half dimes of '92. This, however, is much disfigured. One side is now almost smooth. On the other are seven arrows, tied together in the middle, - crossing each other - both extremities being extended, so as to resemble, somewhat, two fans, joined together at the base. The only legible figure of the date is a 7; - but whether this is the second or third figure of the date, I cannot tell. I have never seen the device on any foreign coin, - tho' I have examined, at various times, a great number.

Very truly,
Yr. obliged & obt. Svt.
W. G. Steams.

R. M. Patterson Esq.
Mint of the U. S. -

The coin is probably a dime of 1795
